HYPERCONVERGED INFRASTRUCTURE
WITH PROCLOUD

Sit back & relax for 5 glorious years

It's hard to relax when legacy infrastructure and ageing disaster recovery are threatening your core IT systems. An environment that lacks power and storage and consumes endless management resources can really drag your IT estate down.

Migrate to a new hybrid hyperconverged infrastructure (HCI) and you can relax with knowing your servers and backups are optimised and under control. You get the flexibility of a hybrid cloud model to optimise costs, plus maximum AI-powered performance.

ProCloud's 5 year technology & service guarantee

It's a bold, market-leading proposition. We'll do whatever is needed to keep your HCI in great shape while you relax... for the next 5 years. ProCloud guarantees the following HPE SimpliVity performance for 5 years or we'll work at no extra cost until we deliver it:

up to **69%**
sustainability &
TCO savings

zero
downtime
for migration

90%
data efficiency
savings

< 60s
to back up a 1TB VM

Guaranteed
data immutability

Choose ProCloud for your HCI project and you can be *confident in the future*

HPE's SimpliVity data virtualisation platform offers market-leading speed, reliability, flexibility and energy savings. ProCloud has a proven track record as a HPE Gold Solution Provider and is the only HPE SimpliVity certified and accredited implementation partner in Ireland. With our repeatable, standardised design, implement and operate service, you can have your hyperconverged infrastructure live within 6 weeks.

HCI with *maximum* technology & business *benefits*

For your *IT function*

- Automated, repeatable, visible, and scalable **backups that always work**
